PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in SQL, Python, Power BI, and Azure data engineering tools (Azure Data Factory, Databricks, Synapse Analytics). Built end-to-end Azure ETL solutions using Medallion Architecture and a Power BI dashboard on 77K+ records. Experienced in data validation and data quality checks through a paid quality analyst internship. Seeking entry-level Data Analyst, Junior Azure Data Engineer, SQL Developer, BI Analyst, or QA Analyst roles.

EDUCATION

R.V.R & J.C College of Engineering **2022 – 2026**
B.Tech in Information Technology | *CGPA: 7.53*

NRI Junior College **2019 – 2021**
Board of Intermediate (MPC) | *Percentage: 88%*

Sri Devi High School **2018 – 2019**
Board of Secondary Education | *Percentage: 88%*

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS
Frameworks/Libraries: FastAPI, Pandas, PySpark, NumPy
Databases/Warehouses: MySQL, Azure SQL Database, Azure Synapse Analytics
Cloud: Azure Data Factory, Azure Data Lake Storage Gen2, Azure Databricks, AWS
Tools: Git, GitHub, Azure DevOps, Azure Logic Apps, VS Code, Jupyter, Power BI, Microsoft Excel

EXPERIENCE

Quality Analyst Intern – Human Archive (YC W26) **July 2026 – September 2026**
Y Combinator W26 startup (multimodal data for robotics) | *Paid Internship* | *3 Months*

- **SQL:** Ran SQL queries daily to retrieve, filter, and validate data for accuracy and consistency.
- **Power BI:** Worked with datasets and dashboards to support data analysis and visualization.
- **AI Data Operations:** Labeled and reviewed 100+ data records daily across 5+ datasets, running data quality checks to support AI/ML workflows.
- **Python:** Used Python for basic data processing, validation, and analysis.
- **Data Quality:** Identified missing, duplicate, and inconsistent records while maintaining data quality standards.

PROJECTS

Airline Booking Data Pipeline | Azure Data Engineering Project **2026**
Azure Data Factory, Azure Data Lake Storage Gen2, Azure DevOps, Logic Apps, Self-Hosted Integration Runtime, ETL/ELT, Medallion Architecture

- Built an end-to-end Azure Data Factory solution with 6 pipelines and 2 data flows, using Medallion Architecture (Bronze, Silver, Gold) on ADLS Gen2 for airline booking data.
- Ingested on-premises data using a Self-Hosted Integration Runtime, plus a REST API and Azure SQL Database; built parameterized pipelines (ForEach) and incremental loading (Lookup).
- Transformed data with Mapping Data Flows (join, aggregate, window, filter) and automated pipeline monitoring with Logic App email alerts.
- Managed source code with Azure DevOps and GitHub.

AdventureWorks Sales Analytics Pipeline | Azure Data Engineering Project **2026**
Azure Data Factory, ADLS Gen2, Azure Databricks (PySpark), Azure Synapse Analytics, Power BI, Medallion Architecture

- Built an end-to-end Azure ETL pipeline (Medallion Architecture: Bronze, Silver, Gold) processing 77K+ records from 10 source files using 1 parameterized Azure Data Factory pipeline.
- Transformed and joined 56K+ sales records using PySpark (Azure Databricks); served via Synapse to Power BI.
- Built a Power BI dashboard tracking $24.9M revenue, 42% profit margin, and 2.2% return rate across 6 countries; found Bikes drive 95% of revenue.

CERTIFICATIONS

- Data Analytics (Virtual) – Deloitte
- Python – Infosys Springboard

LEADERSHIP

- IEEE Student Branch Chairperson
